

MERN Stack Intern Test Task

Mini CRM Lead Manager

Objective

Build a **Lead Management System** where users can:

- Add leads
- Track status
- Assign leads
- View analytics (basic)

Core Requirements

1. Backend (Node.js + Express + MongoDB)

Must include:

- Authentication (JWT)
 - Login / Register
 - Protected routes

Lead Model:

```
{  
  name: String,  
  email: String,  
  phone: String,  
  status: "new" | "contacted" | "converted",  
  assignedTo: String,  
  createdAt: Date  
}
```

APIs:

- Create Lead
- Get All Leads (with pagination)
- Update Lead Status
- Delete Lead

Frontend (React)

Must include:

- Login page
- Dashboard page
- Lead table (with:
 - search
 - filter by status)
- Add Lead form
- Update status dropdown
